I am a seasoned **Fullstack Website Develope**r with a robust skill set encompassing *Laravel*, *Vue.js*, *React*, and cloud hosting. My proficiency empowers me to provide comprehensive solutions for your website needs.

I am currently the Dev Co-Lead Google Developers Group on Campus, University of Uyo.

As a Web team lead of **DALENSAI**, I have had experience in managing other developers, having the advantage of being a Fullstack Engineer. I used my Vue js Skills, Laravel Skills and also used things like websocket to communicate with an AI model. I also used my Devops skills (cPanel, WHM) to deploy the site. I have been incharge of a github company repo, accepting and making pull request, merging and resolving admin conflicts which has trained me to be a better develope who isn't moved by bugs.

In my prior role as a Web Developer at **FABRICSPA**, I garnered invaluable expertise in *NodeJs*, *cPanel*, *WHM*, alongside a grasp of *DevOps*. Over the span of three years, I significantly contributed to the creation of diverse web applications, refining my aptitude in NodeJs and ExpressJs development. My immersion in *DevOps* practices also allowed me to optimize deployment procedures, enhancing overall project efficiency.

My tenure as an intern at **RootHub** provided me with hands-on experience in front-end development projects, allowing me to delve into *Vue.js* and *React*. This exposure, synergizing with my existing backend skills, has made me a versatile developer adept at delivering holistic solutions.

As an avid tech enthusiast, I remain committed to staying abreast of the latest industry trends and best practices. My ardor for cloud hosting has honed my skills in deploying applications on cloud platforms, ensuring seamless scalability, heightened security, and peak performance.

I am known for my unwavering commitment to delivering code of impeccable quality. My knack for effective collaboration across multidisciplinary teams has been instrumental in the successful completion of projects, often resulting in glowing client feedback. A resolute work ethic and exceptional problem-solving capabilities define my approach, enabling me to tackle intricate challenges with confidence.

I am enthusiastic about the prospect of potentially collaborating with you. Your project's success is my utmost priority, and I am dedicated to securing positive outcomes through my expertise and dedication.

Education

University of Uyo, *Computer Science* 🔗   10/2023 – present
Currently learning the basics of computer science to backup my already existing skills

Nigerian Christian Institute, *Secondary or High School Education* 🔗   2015 – 2022
I acquired my secondary education here

Early Learning centre,, *Primary Education*   2010 – 2015
I acquired my primary education here

My Certifications

First School Leaving Certificate (FSLC)
Awarded by The Early Learning Center

High school O level
Awarded by The Nigerian Christian Institute

Website Development Course
Awarded by The Roothub

Work Skills

Vue js
With proficiency of 4+ years

React Js
With proficiency of 2+ years

NodeJs
With proficiency of 2+ years

Cpanel & Whm configuration
With proficiency of 2+ year

Rust
With proficiency of 1 year

FunC
With proficiency of 1 year

Laravel
With proficiency of 3+ years

Php
With proficiency of 3 and a half + years

Nuxt Js
With proficiency of 2+ years

Solidity
With proficiency of 1 year

Next Js
With proficiency of 2+ years

Tact
With proficiency of 6+ months

Professional Experience

Front-end Website Developer, *Ethairos*   07/2018 – 10/2018
This was a personal project I did

Front-end Website Developer Intern, *Roothub*   09/2022 – 02/2023
I was learning here at first and then was retained as an intern   Remote

Fullstack Website Developer, *FabricSpa* 🔗   07/2023 – 09/2023
I was employed as a **Fullstack Developer**, from which I upskilled to a **Server**   Remote
Architect as well. It was a project that spanned for three months.

Fullstack Website Developer, *OfficePro* 🔗
Here I built and deployed their website with my team.

Blockchain Developer, *Compad* 🔗   09/2023
I am the blockchain developer in charge of this crypto related project   Nigeria

Website Development Team Lead, *DalensAi* 🔗   10/2023 – 12/2023

Blockchain Developer, *Acncoin* 🔗   12/2023 – 02/2024
I am the blockchain developer in charge of this project   Brazil

Backend Developer, *Kribb*
I built the backend for the app with Laravel (PHP).

Backend PHP Tutor, *Roothub* 🔗   01/2024 – 05/2024
I teach backend php to my students.   Uyo, Nigeria

Frontend Development Tutor, *Tech-up A Girl Foundation*   02/2024 – 08/2024
I teach frontend development to my female students in the foundation.   Remote

Fullstack Website Developer, *Swap2Naira*   02/2024
I am building the frontend (ReactJs) and the backend (Laravel) in this project.   Lagos, Nigeria

Backend Developer, *Vistapay* 🔗   05/2024 – present
This is a part-time startup project. I am building their backend with Laravel   Nigeria
(PHP)

Fullstack Website Developer, *Foodpreneurshub* 🔗   07/2024 – 10/2024
I worked on the website both front-end and backend.

Blockchain Developer, *Vestpad* 🔗   08/2024
I am building the launchpad using Solidity.
